WALTON
TECHNICAL GROUP

Procurement & sourcing

Technically informed sourcing. Less purchasing administration.

Sourcing specialist parts and manufactured components takes more than comparing unit prices. We help engineering businesses develop supplier options, run structured RFQs and assess quotations against technical and commercial requirements.

WHAT WE CAN DELIVER

Supplier identification

Targeted searches for UK and international suppliers against drawings, specifications, volumes, quality needs and required lead times.

RFQ management & comparisons

Consistent enquiry packages and clear quotation comparisons covering compliance, commercial terms, lead times and delivered costs.

Supplier clarification & follow-up

Coordinated technical queries, quotation revisions, supplier responses and the information needed to support a purchasing decision.

Delivery & import coordination

Order and shipment milestone tracking, with liaison through your nominated logistics and customs specialists where applicable.

What you receive

A supplier shortlist, comparable options, key assumptions and a clear basis for next steps.

Purchasing remains in your control

Your company approves suppliers and contracts directly for goods; appointed specialists handle customs formalities.
